When you enroll as a student or subscriber ("learner") on our site or related courses, as part of the enrolling process, we collect the personal information you give us such as your name and email address.

Email marketing: we may send you emails about our site and related course(s), registration, course content, your course progress or other updates. We may also use your email to inform you about changes to the course, survey you about your usage, or collect your opinion.

2. How do you get my consent?

When you provide us with personal information to become a learner on our site, make a purchase, or participate in the course, you imply that you consent to our collecting it and using it for that specific reason only.

If we ask for your personal information for a secondary reason, like marketing, we will either ask you directly for your expressed consent, or provide you with an opportunity to say no.

How do I withdraw my consent?

If after you opt-in, you change your mind, you may withdraw your consent for us to contact you, for the continued collection, use or disclosure of your information, at any time, by contacting us at info@agilityforall.com or +34 936 739 252 or +1 571-426-6594.

3. Disclosure

We may disclose your personal information if we are required by law to do so or if you violate our Terms of Service.

4. MemberVault

Our course and site is hosted by MemberVault LLC ("MemberVault"). They provide us with the online course creation platform that allow us to sell our product/services to you and to host the course content.

Your data is stored through MemberVault's data storage, databases and the general MemberVault application. They store your data on a secure server behind a firewall.

Their privacy policy may be read in detail at https://membervault.co/privacy/ including their GDPR policies and privacy officer for residents of Europe.

Payment:

If you make a purchase on our site, we use a third party payment processor such as Stripe or Paypal. Payments are encrypted through the Payment Card Industry Data Security Standard (PCI-DSS). Your purchase transaction data is stored only as long as is necessary to complete your purchase transaction.

All direct payment gateways adhere to the standards set by PCI-DSS as managed by the PCI Security Standards Council, which is a joint effort of brands like Visa, MasterCard, American Express and Discover.

PCI-DSS requirements help ensure the secure handling of credit card information by our site and related courses and its service providers.

5. Third Party Services

In general, the third-party providers used by us will only collect, use and disclose your information to the extent necessary to allow them to perform the services they provide to us.

However, certain third-party service providers, such as payment gateways and other payment transaction processors, have their own privacy policies in respect to the information we are required to provide to them for your purchase-related transactions.

For these providers, we recommend that you read their privacy policies so you can understand the manner in which your personal information will be handled by these providers.

Certain providers may be located in or have facilities that are located in a different jurisdiction than either you or us. If you elect to proceed with a transaction that involves the services of a third-party service provider, then your information may become subject to the laws of the jurisdiction(s) in which that service provider or its facilities are located.

As an example, if you are located in Canada and your transaction is processed by a payment gateway located in the United States, then your personal information used in completing that transaction may be subject to disclosure under United States legislation, including the Patriot Act.

Once you leave our course website or are redirected to a third-party website or application, you are no longer governed by this Privacy Policy or our website's Terms of Service.

If you provide us with your credit card information, the information is encrypted using secure socket layer technology (SSL) and stored with a AES-256 encryption. Although no method of transmission over the Internet or electronic storage is 100% secure, we follow all PCI-DSS requirements and implement additional generally accepted industry standards.
