SPEAKERS

Remi Oduyemi

Remi Oduyemi 00:18

Hey everybody, welcome to co working just gonna wait a moment to see who else is gonna join us and then we will begin. Welcome guys to the co working session. My name is Remi I am part of team member vault, and I am an entrepreneur who uses member vault, as well. I use it to grow my business every day and I use it to build member vault accounts for my clients as well, on, on this fantastic software that we are all here to use this co working session is, is here to help support you to work inside of your member vault. And if you get stuck, then you have support and somebody to help you. This session is aimed at beginners and if you have more technical stuff, then we can always refer you to our help desk, our chat support on our email support, and also Katrina does office hours on a Wednesday which I'll tell you about at the end of the session. So what you need to know today is the first thing I need you to do is in the chat box is to write for me what it is you're going to be working on in the next hour on your member vault, and you're working on a course or a program or something that you've been procrastinating about doing for a long time, you setting up your emails or your payments. If you could go into the chat now and set your intention of what you're going to be working on for the next hour with us here today. And then at the end of the session I will come back at about five minutes before we end and ask you to update in the chat box. What it is, you have achieved in this co working session today. Can you all hear me, and, and does that make sense about what you need to do now. Yes, I can see cats right and so that means you can hear me, brilliant. But yeah, if you could pop into the chat what you are intending to work on. And then I will check back with you at the end, I will also check in at the halfway mark. So if you are deep

in work and deepens thought suddenly my voice might start to you, I will check it out halfway, and I will check in at five to on I will try and answer as many of your questions in the chat rather than talking because sometimes when I pop up I know it startles people, any questions go ahead and put them in the chat. Otherwise let's let's get to work. Let's get working on our member volts alright guys we are now streaming live into the member rope community. Just to let you know. And I'm just going to quickly read out what you guys are working on okay cat will be working on two products set up in envy that she created for clients so that they can have access to the documents, but she hasn't added the image price or the wording yet so she's going to be doing that today. Excellent cat hiney is going to be working on creating a sales and the sign up page for my circle community. Amazing. Isabel is going to be linking her. Get Response to member volt, I don't know what that is about. But it sounds interesting and maybe setting up a new list for my new coaching business fabulous. Laura is going to be working on our welcome area inside of our member vault account. Amazing. Silas is working on uploading my freebies. Brilliant Ronica will be working on module one, of course, on pricing strategies for small businesses. Amazing. Kareena I'm working on setting up my envy page for my first mini course, yay. Love. Laura's work working on an email sequence after course delivery brilliant. Nancy is writing copy for an upcoming course amazing Nancy, Isabelle says GetResponse is an autoresponder. Thank you. All right guys, you guys all have some amazing tasks to be getting on the web. I'm here to support you if you need me, but otherwise let's do some work in our Member vault accounts, and I can't wait to hear how much you guys got done at the end. Hi Justin. Do you have a question you want to pop it into the chat for me. Just to say if you do have a question, make sure you share it to everyone, not personal messages just to me. That's because the answers will actually help more people so if you have any questions or you're stuck with something, do pop it in the chat for everyone, and then I'll be able to help everyone. As a result, Thank you. So I'm just going to answer a question from Ashley, if my voice interferes with your working, feel free to mute to me for a few minutes. So Ashley is asking about is there a section that I can put resources in for my students. Yeah, if they do want to unmute and talk you through what you could do. Hello darlin. So, are there. Is it exclusively students coming, or are there other people coming into your product. Okay. Yeah, so that's all possible inside a member vault, you can upload PDFs which they can download and you can embed videos into the, the text areas inside of memovox I didn't know if you meant if you wanted to have like a separate resource area where you wanted to have a product that was just, you know just their, their resources which you could do you could just make you have maybe one product is where they sign up and another product where you just put all their resources in, so their videos and their, their downloads if you wanted to, but otherwise you could just do it inside of modules and then inside of lessons, you could just put the PDFs in each one. Does that make sense, is that what you was aiming. Yeah. Yeah. Yeah, and it's just add a file there's Add a File section then you just upload a PDF or whatever you want to upload

there so they can have the video, and then yeah, when they look at it from their point of view they would see like your text or video and then at the bottom, they would have the downloadable PDF and then underneath that there's a section if you wanted to ask them questions and get them to do a bit homework or feedback you can add those at the bottom as well. To do a screen share and show you what you think you'll be able to figure it out. Remember, no worries, No worries. I was so busy typing I forgot to tell you that we are halfway guys. And that's we have another 30 minutes to go, and I will check in with you at five to five, to see how you got on. But yeah, keep firing those questions in the chat and I'll be helping you over there. I'm just going to share screen and show Jocelyn, Where lessons go inside of member volt. See this. Okay. All right, got me. Thank you. I've got all the windows and the things in the way. Okay, so this would be your, your product that you'd go into I've just called this Remi demo right so it's just a Demo, demo account. So, over here on the right hand side is where your modules live. And I've just created something called a test module if you wanted to create one you would just hit this green button here and name it whatever you want to call this module on Nicolette Jocelyn, because in this module, I'm going to learn everything about Jessalyn. And then once you are inside of that module, your lessons live here, and so you would create whatever your lesson is by hitting the Add lesson button and giving that lesson, a title so it might be about, just gonna add that lesson. So if you see up here, this is kind of the pathway of where you've been so that's where you started. This is your module, and then this is your lesson, and it's inside of this area where you add your content so you could write some words in here, you can add images in here, you could add video in here as well if you want to. By using these options here so this allows you to add coded things into here, you know like embed codes. You can upload pictures, you can add links all of your content stuff goes in the lesson text area, but you can also add video here. So if you use, I don't know YouTube or Vimeo and you get an embed code. You can, if you wanted that to be the first thing that people saw on the page, you could use this video type area. So you select which one of them, you're using or other. And then in here you would copy and paste in, you can see some of my old code here from where I've embedded things so your videos could go there, or you could put videos inside your lesson text so sometimes people like to, you know say welcome to this lesson in this lesson I'm going to teach you about data data. And then here's the video and so then you can embed the video into the lesson text, and then at the end of the video, there is a homework area. So, this if you ask them to feed back to you or give you some response, they can put the answers here into this lesson area. And then the other thing that you can do in the lesson, area is if you wanted to upload a file to like a PDF or a download for them to take away, you could just add file here, and then upload it from your computer into this lesson. And if you wanted to ask them some questions like, How was this video for you, or how was this training for you and what, what were your takeaways right, you could ask those questions there and they will automatically populate. At the bottom of the page with a box for them to answer. And

you can ask, you know, essay questions you can ask multiple choice questions yes no type questions so this is a really nice way to get your audience to start engaging with you at the lesson module. I'm hoping that it gives you a clearer understanding just learn about how to get to the lessons and then where to put your content. Sure. Yeah, so this little thing here, I mean obviously there's only one here right now but you would be able to pick it up and move it and like put it one above the other. Do you see what I mean. You're very welcome. Google Docs. Oh yeah, yeah, yeah 100% Yeah. So you could either create something in Google Doc and then have that uploaded from your Google Doc into member vault as a file, and I also use like Google Forms so I actually create a form inside of Google, that I might need somebody that aren't the survey or answer some questions. And then I can copy the code from Google Docs, into my member volt, into the lesson area. And so then the form is inside of my member volt. So, yeah, It's completely compatible. All right. No problem. Alright guys since the last five minutes. If you could drop into the chat for me. Two things I want you to tell me what you've worked on on your member volt in this hour. And also, drop your member vote link as well because we are going to share that into the collaborative group, and we will share this into the replay area as well so if you could drop into the chat what you've managed to achieve today working on your member vote, and also your member vote links that will be great. Okay so Marva worked on her true strengths Guide, which is currently invisible, that's fine. Lots of people do use invisible actually. So it's absolutely fine. And Marva has dropped her link, Jocelyn, you have to go to your, your member of our product and then copy the link from the search bar, and come and drop that into here for me. Kareena, I'm still fussing with my branding, but my emphasize 20 is no link yet that's fine, that's absolutely fine. Lori has finished the copy for her welcome area welder Laurie. She says she'd left her image there for now but she may switch to an audio on video and she's dropped her member role link and says thank you so much, and that she loves this format you're very welcome and Haney Haney Oh honey, I'm really sorry if I'm saying that wrong. I want to say Hi, Annie. She has finalized setting up her freebie. Still working on the membership product, and I need to write more copies, don't we all, don't we, oh, it's not yet active, but it is currently invisible that's perfect. Well done for doing that today. Jocelyn thank you for the link. Well done. Thank you for your questions by the way. And by the way guys, there has been lots of questions today. Please remember, you can reach out with any questions to our support team at Hello at member.volt.co. If you want a Pay Plan, you can use the chat support bubble as well if you, if you want to reach out that way as well but we are here to help you so send those messages through. We've got lots of resources that can help you also over on our knowledge base, I will drop that link before you will go. Laura created her first onboarding email well done, Laura. Yes, that is the product link well done. Jaime. Thank you. Remember the next time. Hey, Amy, thank you. Cat. I've got one of my products ready to make visible minus an image, and the second one is started, yes cat, well done. We'll crack on and get that done now to brilliant and she's dropped her link in there. Well

done cat that's awesome work today. Amy says oh my god the copy so much, man. I know. Jocelyn has learned how to add modules and lessons well done justly, thank you for being here and asking those questions that are really important. And hopefully the answers I've been giving will help everyone to soulless says that they have added some freebies and bonus and a bonus product, all my products are invisible and not ready for viewing. Okay, that's fine. No worries, listen any questions you have Silas please do reach out to us. Hello at member volt.co. So we can help reassure you and support you if you're worried about anything. Okay, please do reach out to us. We are here to support you. Veronica worked on introduction, only two module content not yet uploaded. Well done, you've worked you've got started. That's the main thing. Well done, Veronica. Nancy said that she got distracted got distracted and ended up adding a new freebie in my subscriber circle instead of working on copy for my new course, it's all good, you've added a new freebie so that's that's amazing, you can support your people more right and get more people in so that's great. I'm happy to know that I'm not the only one who doesn't love writing copy. We all need our own little copy fairies don't wait. And Isabelle says wonderful is this every Thursday, yes it is every Thursday at 4pm so brilliant. Veronica says adding lessons tutorial helpful. Amazing. Yes, every, every, every week 4pm I will be here. Also if you are on a paid plan. And I know there are lots more of you now on the paid plan since the changes that happened yesterday. If you want to pay plan, then you can access Office Hours with Katrina, which is a similar ish session to this it's not really co working, but it's where you can learn more advanced stuff and ask lots more technical questions. And that's every Wednesday at 2pm with Katrina era sends out an email every week so make sure you open the member of our emails as well because the links are in there to both this and to office hours as well so if you're wondering how do you find out about Office Hours Marva says yeah I just paid yesterday and so excited. Well done. Yeah, make sure you open the emails because they a the emails are amazing because we've got amazing writers on the team, and they're full of useful stuff like really useful stuff. So open the emails and getting the links there. Haney says thank you so much. This is such an awesome thing to offer our Thank you really appreciate all the help and support from envy you are very welcome. We are really really super supportive team. So, we and we love hearing from you and helping you, so do reach out like honestly reach out on the emails in the chat. That is what is there for to support you. And if you could do me a favor and when you hop into the member volte group next if you could leave some feedback about this session today that would be super helpful because we want to help as many people as we can, and your feedback really helps to get people to come along to these sessions. I've told you about the email support, keep working on your member roles, and we will be back next week. So you guys are free to leave, I'm just going to copy out all of this chat so that we have a log of this, and all the amazing questions and the answers, and all of your links so that I can share those, but otherwise guys we are wrapped for another week so thank you so much for spending an hour with me, working on your

member well. I love seeing how much you guys have, ah, Isabelle says can you share the Facebook group link please, of course, of course I can, I'll do that before we go, let me do that now. Let me just bounce to the other screen should be facebook.com forward slash groups forward slash member vault I'm just going to double check that actually isn't so I'm going to copy that, and I might go into the groups and change that. But let's put this in the chat for you guys. That's the Facebook group link. I'm also going to quickly drop the link for you guys but I will pop this into the main chat as well. I'm sorry the replay and this will go into the group, and I will drop the knowledge base. So if you guys, I mean, if you are just starting with them about, and this is a really great place for you to begin there is an actual Getting Started roadmap and stuff that's really simply explained. There we go. Member volt dot alivio dot help dot e n, right by Kat, thank you all for being here, Veronica is about soulless Kareena Laurie Haney, Nancy, Jocelyn mother and Carrie just turned up, it's been lovely to see you all. And you're very welcome guys, and I'll hopefully see you all next week, Guys,
